

# BRANDWAG COUNCIL RAPID ASSESSMENT OF ADOLESCENT SEXUAL AND REPRODUCTIVE HEALTH (ASRHR)

JANUARY 2022

## FACT SHEET

This fact sheet is a summary of the findings of the ASRHR Rapid Assessment undertaken in Brandwag Council as part of an eight-country study<sup>1</sup> from November 2019 to December 2020. The research aims to strengthen youth-led and focused efforts to promote ASRHR through gender and youth-responsive local governance. Gender Links South Africa conducted the study in 29 Centers of Excellence for Gender in Local Government.<sup>2</sup> In Brandwag, the study covered 1 clinic; 45 respondents: 56% young women and 44% young men (see table overleaf). This fact sheet should be read together with the South Africa and the Southern Africa ASRHR Rapid Assessment research pamphlets. Key findings include:

### Accessibility

- All the respondents reported being within 10 km of a clinic.
- The majority (98%) of respondents, said that the clinic is open after school.
- None of the respondents said the clinic opens during weekends.
- Eighty-nine percent of respondents said that the clinic had a comfortable waiting area.
- None of the respondents said that the clinic charged fees for its services.

### Quality of care

- The majority (98%) of respondents said they were treated with respect.
- Eighty-four percent of young people indicated that there was privacy at the clinic.

- Ninety-three percent of respondents said they were treated with confidentiality.
- Less than half (47%) of respondents said that the clinic did not require their parents to be present.
- The majority (84%) of young people indicated that health workers spent sufficient time with them.
- Thirty-six percent of young people said they received appropriate information. Availability of information is a key component of ASRHR that gives young people a #VoiceandChoice.

### Sexual and reproductive health services

- Sixteen percent of young people requested contraceptives. The majority (86%) of those who requested contraceptives received them. This relatively low percentage of young people requesting contraceptives is worrying as access to contraceptives is key to ensure that ASRH is prioritised.
- None of the young women interviewed requested a pregnancy test.
- At 0%, the overall demand for male circumcision, which has been shown to reduce the spread of HIV and AIDS, is very low.
- Only 11% of respondents requested an HIV test. All of those who asked for this test received it.
- Twenty-seven percent of respondents said health workers asked about their mental health. This is a concern, as ASRHR and mental health are closely linked.
- A third (30%) of young people said that a follow-up appointment was set up whilst 42% of young people were referred to a relevant facility.

<sup>1</sup> Botswana, Eswatini, Lesotho, Madagascar, Mauritius, South Africa, Zambia and Zimbabwe.

<sup>2</sup> Blouberg, Brandwag, D'Almeida, Dana Bay, Emfuleni, Friemersheim, Great Brak, Hartenbos, Herbertsdale, Joburg City-Orange Farm-Region G, Joburg City-Soweto-Region D, Joe Slovo, Kwanongaba, Lepelle Nkumpi, Midvaal, Mogale City, Molemole, Mossel Bay, Polokwane, Sonskyn Valley, eThekweni Ward 101, eThekweni Ward 11, eThekweni Ward 26, eThekweni Ward 31, eThekweni Ward 34, eThekweni Ward 68, eThekweni Ward 98 (Umkomaas), eThekweni Ward 98 (Umnini).
