

eTHEKWINI Ward 11 COUNCIL RAPID ASSESSMENT OF ADOLESCENT SEXUAL AND REPRODUCTIVE HEALTH (ASRHR)

JANUARY 2022

FACT SHEET

This fact sheet is a summary of the findings of the ASRHR Rapid Assessment undertaken in eThekweni Ward 11 Council as part of an eight-country study¹ from November 2019 to December 2020. The research aims to strengthen youth-led and focused efforts to promote ASRHR through gender and youth-responsive local governance. Gender Links South Africa conducted the study in 29 Centers of Excellence for Gender in Local Government.² In eThekweni Ward 11, the study covered 1 clinic; 41 respondents: 49% young women and 51% young men (see table overleaf). This fact sheet should be read together with the South Africa and the Southern Africa ASRHR Rapid Assessment research pamphlets. Key findings include:

Accessibility

- All of the respondents reported being within 10 km of a clinic.
- All of the respondents said the clinic opens after school.
- None of the respondents said that the clinic opens during weekends.
- Only 15% of respondents said that the clinic had a comfortable waiting area.
- The clinic does not charge fees for its services.

Quality of care

- The majority (68%) of respondents said they were treated with respect.
- Sixty-six percent of young people indicated that there was privacy at the clinic.
- Sixty-one percent of respondents said they were treated with confidentiality.
- Sixty-three percent of respondents said the clinic did not require their parents to be present.

- Fifty-nine percent of young people indicated that health workers spent sufficient time with them.
- Over two-thirds (68%) of young people said they received appropriate information. Availability of information is a key component of ASRHR that gives young people a #VoiceandChoice.

Sexual and reproductive health services

- Eight-two percent of young people requested contraceptives. All of those who requested contraceptives received them. This high percentage of young people requesting and receiving contraceptives is encouraging as access to contraceptives is key to ensure that ASRH is prioritised.
- All of the young women requested a pregnancy test and all of them received it. All of the young women were pregnant at that time.
- At 100%, the overall demand for male circumcision, which has been shown to reduce the spread of HIV and AIDS, is very high. It is encouraging that all who requested male circumcision received an appointment.
- None of the youth requested PREP nor post-exposure prophylaxis (PEP).
- All of the respondents requested an HIV test, and all those who asked for this test received it.
- All the respondents (100% overall) said health workers asked about their mental health. This is encouraging, as ASRHR and mental health are closely linked.
- All of the young people said a follow-up appointment was set up and they were all referred to a relevant facility.

¹ Botswana, Eswatini, Lesotho, Madagascar, Mauritius, South Africa, Zambia and Zimbabwe.
² Blouberg, Brandwag, D'Almeida, Dana Bay, Emfuleni, Friemersheim, Great Brak, Hartenbos, Herbertsdale, Joburg City-Orange Farm-Region G, Joburg City-Soweto-Region D, Joe Slovo, Kwanonqaba, Lepelle Nkumpi, Midvaal, Mogale City, Molemole, Mossel Bay, Polokwane, Sonskyn Valley, eThekweni Ward 101, eThekweni Ward 11, eThekweni Ward 26, eThekweni Ward 31, eThekweni Ward 34, eThekweni Ward 68, eThekweni Ward 98 (Umkomaas), eThekweni Ward 98 (Umnini).
