

# eTHEKWINI Ward 26 COUNCIL RAPID ASSESSMENT OF ADOLESCENT SEXUAL AND REPRODUCTIVE HEALTH (ASRHR)

JANUARY 2022

## FACT SHEET

This fact sheet is a summary of the findings of the ASRHR Rapid Assessment undertaken in eThekweni Ward 26 Council as part of an eight-country study<sup>1</sup> from November 2019 to December 2020. The research aims to strengthen youth-led and focused efforts to promote ASRHR through gender and youth-responsive local governance. Gender Links South Africa conducted the study in 29 Centers of Excellence for Gender in Local Government.<sup>1</sup> In eThekweni Ward 26, the study covered 1 clinic; 39 respondents: 51% young women and 49% young men (see table overleaf). This fact sheet should be read together with the South Africa and the Southern Africa ASRHR Rapid Assessment research pamphlets. Key findings include:

### Accessibility

- Ninety percent of respondents reported being within 10 km of a clinic.
- Responses to whether the clinic opens after school were high at 92%.
- Only 10% of respondents, said that the clinic opens during weekends.
- Ninety-five percent of respondents said that the clinic had a comfortable waiting area.
- The clinic does not charge fees for its services.

### Quality of care

- The majority (79%) of respondents said they were treated with respect.
- Eight-two percent of young people indicated that there was privacy at the clinic.
- Eighty-two percent of respondents said they were treated with confidentiality.
- Less than half (49%) of respondents said that the clinic did not require their parents to be present.

- Seventy-seven percent of young people indicated that health workers spent sufficient time with them.
- Seventy-seven percent of young people said they received appropriate information. Availability of information is a key component of ASRHR that gives young people a #VoiceandChoice.

### Sexual and reproductive health services

- The majority (80%) of young people requested contraceptives. All of those who requested contraceptives received them. This high percentage of young people requesting and receiving contraceptives is encouraging as access to contraceptives is key to ensure that ASRH is prioritised.
- All the young women in the sample requested a pregnancy test and all of them received it. Thirty-three percent of young women were pregnant at that time.
- At 100%, the overall demand for male circumcision, which has been shown to reduce the spread of HIV and AIDS, is very high. It is encouraging that 67% of those who requested male circumcision received an appointment.
- None of the youth requested PREP and none requested post-exposure prophylaxis (PEP).
- All of the respondents requested an HIV test and all those who asked for this test received it.
- Only 33% of respondents said health workers asked about their mental health. This is a concern, as ASRHR and mental health are closely linked.
- All of the young people said that a follow-up appointment was set up whilst 50% of young people were referred to a relevant facility.

<sup>1</sup> Botswana, Eswatini, Lesotho, Madagascar, Mauritius, South Africa, Zambia and Zimbabwe.

<sup>2</sup> Blouberg, Brandwag, D'Almeida, Dana Bay, Emfuleni, Friemersheim, Great Brak, Hartenbos, Herbertsdale, Joburg City-Orange Farm-Region G, Joburg City-Soweto-Region D, Joe Slovo, Kwanonqaba, Lepelle Nkumpi, Midvaal, Mogale City, Molemole, Mossel Bay, Polokwane, Sonskyn Valley, eThekweni Ward 101, eThekweni Ward 11, eThekweni Ward 26, eThekweni Ward 31, eThekweni Ward 34, eThekweni Ward 68, eThekweni Ward 98 (Umkomaas), eThekweni Ward 98 (Umnini).
