

eTHEKWINI Ward 88 COUNCIL RAPID ASSESSMENT OF ADOLESCENT SEXUAL AND REPRODUCTIVE HEALTH (ASRHR)

JANUARY 2022

FACT SHEET

This fact sheet is a summary of the findings of the ASRHR Rapid Assessment undertaken in eThekweni Ward 88 Council as part of an eight-country study¹ from November 2019 to December 2020. The research aims to strengthen youth-led and focused efforts to promote ASRHR through gender and youth-responsive local governance. Gender Links South Africa conducted the study in 29 Centers of Excellence for Gender in Local Government.² In eThekweni Ward 88, the study covered 1 clinic; 55 respondents: 55% young women and 45% young men (see table overleaf). This fact sheet should be read together with the South Africa and the Southern Africa ASRHR Rapid Assessment research pamphlets. Key findings include:

Accessibility

- Eighty-nine percent of respondents reported being within 10 km of a clinic.
- Responses to whether the clinic opens after school was high at 95%.
- Only 7% of respondents said that the clinic opens during weekends.
- Fifty-five percent of respondents said that the clinic had a comfortable waiting area.
- The clinic does not charge fees for its services.

Quality of care

- The majority (93%) of respondents said they were treated with respect.
- Seventy-one percent of young people indicated that there was privacy at the clinic.
- Eighty-four percent of respondents said they were treated with confidentiality.
- Three quarters (75%) of respondents said that clinics did not require their parents to be present.

- Over two-thirds (69%) of young people indicated that health workers spent sufficient time with them.
- Less than half (49%) of young people said they received appropriate information. Availability of information is a key component of ASRHR that gives young people a #VoiceandChoice.

Sexual and reproductive health services

- Only 10% of young people requested contraceptives. However, all of those who requested contraceptives received them. This relatively low percentage of young people requesting contraceptives is worrying as access to contraceptives is key to ensure that ASRH is prioritised.
- Only 7% of young women requested a pregnancy test and all of them received it. Fourteen percent of young women were pregnant at that time.
- At 13%, the overall demand for male circumcision, which has been shown to reduce the spread of HIV and AIDS, is relatively low. It is encouraging that all of those who requested male circumcision received an appointment.
- Only 8% of youth requested PREP while none requested post-exposure prophylaxis (PEP).
- Forty-four percent of respondents requested an HIV test. All of those who asked for this test received it.
- A relatively low percentage of respondents (17% overall) said health workers asked about their mental health. This is a concern, as ASRHR and mental health are closely linked.
- Twenty-six percent of young people said that a follow-up appointment was set up whilst 15% of young people were referred to a relevant facility.

¹ Botswana, Eswatini, Lesotho, Madagascar, Mauritius, South Africa, Zambia and Zimbabwe.

² Blouberg, Brandwag, D'Almeida, Dana Bay, Emfuleni, Friemersheim, Great Brak, Hartenbos, Herbertsdale, Joburg City-Orange Farm-Region G, Joburg City-Soweto-Region D, Joe Slovo, Kwanonqaba, Lepelle Nkumpi, Midvaal, Mogale City, Molemole, Mossel Bay, Polokwane, Sonskyn Valley, eThekweni Ward 101, eThekweni Ward 11, eThekweni Ward 26, eThekweni Ward 31, eThekweni Ward 34, eThekweni Ward 68, eThekweni Ward 98 (Umkomaas), eThekweni Ward 98 (Umnini).
