GBV AND THE SADC PROTOCOL ON GENDER AND DEVELOPMENT

Response and support

The SADC Protocol provides that by 2015 state parties shall:

- Enact and enforce legislation prohibiting all forms of gender-based violence;
- Ensure that laws on gender-based violence provide for the comprehensive testing, treatment and care of survivors of sexual assault;
- Review and reform their criminal laws and procedures applicable to cases of sexual offences and gender-based violence;
- Enact and adopt specific legislative provisions to prevent human trafficking and provide holistic services to the victims, with the aim of re-integrating them into society;
- Enact legislative provisions, and adopt and implement policies, strategies and programmes which define and prohibit sexual harassment in all spheres, and provide deterrent sanctions for perpetrators of sexual harassment.

Prevention

- The Protocol provides for measures, including legislation, to discourage traditional and cultural practices that exacerbate gender-based violence and to mount public campaigns against these.

Integrated approaches

- The SADC Protocol on Gender and Development calls on states to adopt integrated approaches, including institutional cross sector structures.

The ultimate goal....

- To reduce current levels of gender-based violence by 2015.

Over half the women of Gauteng have experienced some form of violence (emotional, economic, physical or sexual) in their lifetime and nearly one in five in the last year. Emotional violence - a form of violence that barely features in police data - is the most commonly reported form of violence. One in four women in the province has experienced sexual violence in their lifetime. Yet violence against women is still regarded as a private affair with only 3.9% of women interviewed reporting this crime to the police. These are some of the stark findings of the Gauteng Gender Violence Indicators study conducted by Gender Links (GL) and the Medical Research Council (MRC). Based on the first ever prevalence/attitude survey on GBV and a range of other tools to determine the true extent of this scourge, *The War at Home* is an eye opener and call to action. The SADC Gender Protocol calls on governments to halve gender violence by 2015. *Gauteng has no time to lose!*
