## **INTRODUCTION**

Gender Links in Partnership with Botswana Association of Local Authorities (BALA) held a workshop from the 3-4 November 2011 at Tutume Sub district Council. Already GL and BALA have conducted 16 gender action plan workshops for councillors scheduled to take place in Botswana. It was a follow up of the At the Coal Face study launched and a strategy document developed by BALA in partnership with Gender Links on February 2009. The workshop was officially opened by Ludo Matshameko BALA Program and Presented the mission ,vision of Gender Links and the objectives Gender Links .The Program manager also briefed participants on the Local government summit held in Johannesburg show casing programs conducted by councils in the SADC on GBV.

A brief background on the workshop and the partnership between BALA were presented by BALA program manager Ms. Ludo Matshameko. In her presentation she briefed the participants on the BALA strategy, training of the BALA councillors and a consultative meeting held at the Palapye on the current roll out of the local government workshops.

## **Objectives**

Objectives of the workshop were to:

- Build gender analysis skills of local councillors and officials, and local government associations;
- Develop gender action plans with local councils as well as localizing the national action plan to end gender based violence

## **Participants**

The participants were 51, of which 36 were men and 15 were women as attached in **Annex B**. Participants were made up of councillors and officials from SowaTown ship authority. Participants were of different age groups and had different educational and professional backgrounds.

## **Workshop content**

The workshop covered topics in the Botswana Local Government Gender Action Plan manual. The manual covers six modules on SADC protocol on Gender and Development, Key Gender Concepts, Gender and Governance, Key Gender Planning Concepts A 365 Gender Action Plan.

## **Facilitators**

The workshop facilitators were BALA Programme Manager, Councillor Patrick Manthe and BALA Projects Manager Ludo Matshameko.

## **DISCUSSIONS**

During the course of the workshop the following discussion ensued:

### **Gender Protocol**

Participants had limited information on the Gender Protocol. They mentioned that they have heard about the protocol in the media but did not have specific information on the contents and the reasons of why Botswana had not signed. On the issue of gender based violence, some of the participants said they have participated in the commemoration of 16 Days of Activism, Violence against Women and Children where they were invited as guests. They lamented that the commemorations do not provide detailed information gender issues. Other participants mentioned that they heard about gender issues during the full council meetings were different ministries of government and NGOs are invited to brief them during council meetings.

### **Decision making positions**

On the issue of women not equally represented in decision making and Power sharing positions, the men said women do not support each other. Some male councillors expressed fear that women now want to take all leadership positions. Men counter parts said the way men and women are culturally socialised has contributed a lot. They say women are shy saying that in most cases they are not assertive. One councillor say they hardly ask a question even in the full council or gotla meetings

### ***"At the Coalface - Gender and Local Government in Botswana"***

At the Coalface research findings was a good tool for this workshop especially that councillors were resistance to accept that women are less represented in councillors. During presentation they were often referred to the study findings. This then made them to believe that the workshop is not an influence of outside

## **STEREO TYPES REINFORCEMENT**

This is one of the practical exercises which is effective in changing participants mind set on women's roles. Participants were able to come out with their own definition of stereotype. The exercise made participants to understand better stereotypes proverbs songs and admitted that they have major contribution to the way women roles are defined in the society. This exercise also raised some interesting debate that some participants suggested that some songs, Proverbs need to be revised while others feel they entertain.

### **Networks**

In terms of the Networks, the councillors said they are aware of existing services and programmes but they do not know how they function and relate to each other. Participants are also not aware of the specific services they provide and recommended that there is a need to ensure that during the international

commemorations these networks must be invited to inform the councillors on the services they provide.

### **Gender Protocol**

Participants had different views, some were of the view that the protocol should be signed while others says, Botswana did well not to sign as there are no resources Both councillors and officials did not have in depth understanding of the Gender Protocol. Some councillors felt it was not necessary to talk about the protocol in Botswana since we have not signed.

### **Gender Based Violence**

The participants agreed that gender based violence does exist. However the men emphasised that they are also experiencing it. Though participants knew and acknowledged all the types of gender based violence, they were not aware of the international, regional and local human rights instruments addressing it. During the discussions, it became evident that gender based violence is a serious issue of concern which needs to be addressed. From the discussions, it appeared like the councillor did not know the role they are supposed to play in addressing the issue. They also did not know that they are supposed to have information on the instruments used to address gender based violence. At the end it was resolved that they need to have information in order for them to not only address the issue, but also to share the information with different committees they interact with and their voters respectively.

### **CHALLENGES**

- Most of the concepts used were new to the participants, thus calling for more time to be devoted to them.
- At the beginning of the workshop, there was resistance, as men felt they had to defend their own.
- Participants felt that plans were difficult and took most of their time.
- Holding meetings in the council chamber was not good as officers live the workshop to their offices and this resulted in the plan remaining with gaps as councillors did not have enough information
- Queries were raised that the dvds should be localised and that men should be interviewed

### **CONCLUSION**

At the end of the workshop, the councillors agreed that they need to continue learning about gender based violence. Some of the councillors have confessed that gender based violence is in existence among families in Botswana. It is therefore critical to address them rather than to on the defensive side as men usually do.

The participants also concluded that it is important for the councillors to understand gender issues, as they represent the electorates who are both men and women. They also agreed that for human development, both men and women have to be represented in decision making positions, because they have different needs, skills and ideas. Councillors lamented that certain things in culture could not be changed but what is important is to educate people as it is the only way to change mind-sets.

Participants appreciated the workshop saying that the training has changed their cultural beliefs on perceptions they had on women especially on the political arena. Both the local government plan and the gender based plan have been developed. The plan will be sent to the council to review and approve it.

Overall the participants felt that the workshop was critical as it addressed the issues which councillors heard them for the first time. Participants gave a good report on eyes and ears and this assisted facilitators to evaluate if participants had attention to the deliberations of the previous days .

### **RECOMMENDATIONS**

- DVDs need to be localised and man should be interviewed to ensure that gender is not about women alone
- More time is needed for this type of workshop.
- The workshop should include more community leaders
- Gender Links should make follow ups on planned activities and plan developed
- Gender Links should run more workshops on gender.
- Political parties should ensure that women are in leadership positions
- Gender equality should be encouraged at all levels and sectors of society  
The President to be lobbied to sign the Gender Protocol as it has some critical issues which currently affect Botswana.

**COMMENTS**

1. Which session did you find most useful? Why?
  - All sessions were equally useful, relevant and informative
  - Mtiso's model because it gives a cycle of events to follow in women empowerment. It can also be used for other issues
  - Sex, gender and stereotypes as it explains how people interact and how the media report on issues of gender
  - Planning session as it gives a way forward and wanted us to put in place what we are not practicing in the authority
  - Gender Based Violence presentation: It exists in our workplace but we are doing nothing about it

- The SADC protocol, I did not know anything about it before the workshop
  - Transformation scorecard as it carries a lot of things which needs to be considered when doing plans in the authority
  - Differentiation between sex and gender because most people usually misinterpret gender
  - Group discussions since you meet people of diverse ideas
2. Which session did you find least useful? Why?
- None
  - At the Coalface, gender and development
3. Any other comments
- Everything was excellent, Keep up the good work
  - I have learnt a lot during the workshop
  - Setswana material, to be retranslated. When you read a statement in the English manual and the other in English the message is not the same.
  - Get a man to present on some of the other issues so as to break the trend and the defensiveness of men. There is still a man/woman thinking when only ladies present.
  - Know your audience well so that you will be able to make an informed decision when choosing an appropriate language for the manual
  - Presenter to use the very same manual that the participants are using, don't use the Setswana version when they have the opposite
  - To be more practical and do our day to day cases
  - I did not know anything about BALA and would like to take part in the facilitation next time
  - People should be encouraged to deal with issues of gender peacefully. The issue of our tradition such as paying of bogadi should be seriously looked at as it gives men the power to assume that they own women. Parents should both contribute to towards their children to start their new lives
  - Excellent approach
  - This kind of information should be delivered to our communities since they think that gender issues are women's issues
  - GBV must be everybody's enemy
  - I recommend follow ups after training to ensure implementation of the outcomes of the workshops

Official Opening speech for Tutume Council Chairperson  
Councilor Makale Workshop on Gender and Local Government at  
Tutume Sub District Council November 3 -4 2011. Gender Links and  
Botswana and Association of Local Authorities Workshop (BALA)

The director of ceremony let me begin by thanking the organizers, Gender Links and the Botswana Association of Local Authorities (BALA), for having honoured Tutume Sub District Council by extending the invitation to us to officially open this workshop. I personally feel very pleased that we are not left in this training.

Director of ceremonies I would like to acknowledge our councilors and senior staff from Tutume Sub District Council to have availed themselves out of their busy work schedules.

I have been informed that this workshop is a follow-up on the Gender and Local Government Strategy Workshop that was held from 9 - 13 February 2009 at The Big Five Lodge in Gaborone still by Gender Links and BALA where by all the authorities of the councils were present. This presents a picture of a true partnership with the Ministry of Local Government. Director of ceremonies the Big Five Gender and Local Government Strategy Workshop held at the Big Five in Gaborone was to facilitate the government's commitment to gender equality in the daily business of the councils. The Director of ceremony, allow me to remind the participants of this workshop that the success in the implementation of the strategy lies in their effective participation during the workshop and also their unreserved commitment to the outcomes of the workshop.

In the study *At the Coalface: Gender and Local Government*, has informed that the countries in the region would not meet the SADC targets if special measures are not adopted. According to the study, women in Botswana though less represented in local government make a positive difference in their communities in areas such safety and security, education, infrastructure development and health. Botswana therefore need to do more to ensure that can be stakeholders in the development agenda.

The study has revealed that, there are variations between councils in the representation of women. For example Tutume currently has 28 men and 3 females. before councils were divided into subs the representation of women stood at.

The director of ceremonies, the results of the study justifies the need for a workshop like this one with an aim to address these gender gaps. I therefore would like to assure Gender Links, BALA and the participants in this workshop

that TutumeSub District Council fully supports the training initiatives by BALA and Gender Links.

I have been informed by the organizers, that the workshop will focus on unpacking gender concepts and engaging in planning and budgeting that is gender sensitive. Indeed this is pivotal ingredient for the council planning processes. " I therefore declare this workshop officially opened"
